## ARTIFICIAL INTELLIGENCE & LAW

## ABOUT THE INSTITUTE

The Fairfield Institute of Management and Technology (FIMT) is a NAAC accredited prestigious college in Delhi with an ambiance of representing the academic culture of the capital town of the largest democracy of the world and a vibrant emerging economy. Established by the Fairfield Group of Institutions, it is an 'A' Grade College approved by the Government of NCT of Delhi, affiliated to the prestigious Guru Gobind Singh Indraprastha University, which is the first university established by the Government of Delhi. FIMT is approved by the Bar Council of India and National Council for Teacher Education and other authenticating bodies. It is backed by a legacy of 46 years of shaping students' career in the country in areas of Management, Commerce, Teachers' Education, Journalism, Information and Communication Technology, Humanities, and Law and Legal Studies. The institutional distinction includes social outreach, field studies and job orientation programs in respective areas of study. It offers improvising add on and value addition courses, especially with health care and other significant activities in context in context. Its vision is to equip students with the knowledge, skill, and values that are necessary for sustaining one's balance between a livelihood and life by providing an effective, supportive, safe, accessible and affordable learning environment.

## ABOUT THE JOURNAL

FIMT LAW JOURNAL is an open access, blind, peer-reviewed journal published under the aegis of FIMT School of Law since 2018 to recognize and foster legal research among legal fraternity. This bi-annual journal intends to examine the contemporary developments in the field of law, both at national and international level.

## AIM OF THE JOURNAL

- The journal aims to publish long and short articles, case comments and book reviews regarding any latest development or new approach in implementation of the law.
- To offer a forum for the community of academicians and legal practitioners to publish their research on wide arrays of law concerning international community also.
- To promote and foster global legal scholarship exchange and reach a wider readership through open access.

## SUGGESTED THEME

This would be a special issue on Artificial Intelligence (AI) & Law with following sub themes:

## **AI and Consumer Protection Laws**

The use of AI in consumer market has increased manifold. Now the personalization is not just limited to advertisements but has extended to the product, prices and contract terms also. This automation has created new degrees of opportunities, risk and liabilities for the consumers. Numerous legal firms are also employing AI for automated compliance monitoring and enforcement of consumer laws. This makes it imperative to examine the impact, positive or negative, of Artificial Intelligence on consumer protection and solve the tussle between AI and Consumer Protection Act and Motor Vehicle Act.

## **AI and Forensics**

Forensics as a subject is a complex intersection of science and law. AI has entered multiple arenas of forensics like digital forensics, multimedia forensics, speaker identification, image processing etc. It plays a crucial role in deciding cases. It can enhance the likelihood of detecting fraud, cybercrime, and other illegal activities. However, there is no proper guideline or statute adhering to international standards regulating investigators and experts. Another major legal concern is its admissibility in the court. Therefore, we need to deliberate upon the issues and challenges faced to chart out a way.

## **AI and Intellectual Property Laws**

AI in near future can disrupt the field of intellectual Property. It is at a complex juncture with copyright, patent and trademark. AI enabled system can create breakthrough inventions without any human intervention. Indian IPR laws are outdated and so it becomes crucial to ruminate on how to amend it on lines of changing technology, keeping in mind the international legal framework.

## **AI and Human Rights**

Artificial Intelligence system can prove to be vital in upholding human rights. It can detect potential violation of human rights. However, there are chances that the real life impact of AI can severely harm human interest if left unchecked. Plethora of issues like the use of deepfakes, job replacement, suppression of freedom of speech on social media, infringement of privacy, furthering gender and race bias over internet etc have cropped up in the past few years. Hence, there is a need to decide on how to re design our laws and regulatory framework to deal with these problems in an efficient manner.

## **Health Care Laws and AI**

The past decade has seen many advances in the field of health care due to the use of AI. It has increased the efficiency of surgeons with use of robots, reduced the cost, and provides better treatment and after care. But there are potential legal and policy issues like lack of transparency, unauthorized use of data, bias, medical malpractice, errors in diagnosis etc. which requires evaluation by law makers and scholars.

## **Artificial Intelligence and International Law**

AI tools are being extensively used by states in governance and enforcement of International Law. There is immense potential for AI to be used in the automation of legal services, legal personality, military and weapon system, cyber defense, treaties, delegation, asylum etc. Therefore, there is an urgent need to explore the substantive areas of International law that will intersect with machine learning.

## **AI and Criminal Justice System**

AI has started metamorphosing the criminal justice system by reducing pendency in courts, increasing accessibility of justice, preventing crime, and modernizing the policing ecosystem. Nonetheless, there is a need to address specific points like criminal liability of AI, predictive justice, unauthorized surveillance, bias and discrimination.

## **Cyber security laws and AI**

Cyber security industry is progressing to keep up with the frequent and sophisticated threats from hackers and AI has an important role in maintaining its agility. Security professionals can now detect vulnerabilities, predict threats, recognize origin of the attack and malicious patterns in network traffic. However, the same AI has been used by hackers to steal proprietary data, and launch attacks. Hence, there is a need to analyze and evaluate the contemporary legal system and recommend measures for improvement.

## TYPES OF SUBMISSION

The FIMT Law Journal invites original, unpublished manuscripts from academicians, judges, and legal professionals or any other interested researchers and writers from India and abroad, in the form of articles, research papers, case comments, reports on legislations, book reviews, appraisal of laws and policies, review article, etc. No word limit is provided, however, each write up should be reasonable as per its theme and coverage. The Editorial Board will give the final opinion depending on the quality of the submission.

## MANUSCRIPT GUIDELINES:

- Long and short articles must be accompanied by an abstract of not more than 250 words.
- There can be a maximum of one co-author in one submission.
- All manuscripts must be submitted in English language only.
- The research paper must be original and unpublished work of the author(s). Plagiarism above 10 % shall attract immediate disqualification.
- The manuscript must be typewritten. The font should be Times New Roman, font size 12, line spacing 1.5, justified alignment (except the title and 'abstract' caption which should be centrally aligned). All pages shall be numbered.
- All entries should be submitted electronically in .doc or .docx format.
- All manuscripts must be accompanied by:
  - A cover letter with the name(s) of author(s), designation, institution/affiliation, the title of the manuscript and contact information (correspondence address, email id, phone number etc.).
  - A declaration that the manuscript submitted is a piece of original and bonafide research work and has not been published or submitted for publication elsewhere.
  - No biographical information or references, including the name(s) of the author(s), affiliation(s) and acknowledgements should be included in the text of the manuscript, the name or document properties.
  - Authors are required to inform the Editorial Board if they have submitted their manuscript to another law journal and if they have received an acceptance for publication.

## MODE OF CITATIONS

All citations shall be placed in foot-notes. ILI Rules of Footnoting must be adhered to. The footnotes must be typewritten in the font Times New Roman, font size 10, line spacing 1.0 and justified alignment.
