Favorable macros to revive margins; long-term outlook remains robust

Driving volume growth through strategic capacity expansion

- JSTL is investing INR600b over the next three years to enhance steelmaking and downstream capacities, operational efficiency, and raw material resources.
- By Sep'27, Phase-I expansion will increase JSTL's domestic crude steel capacity by 17% to 41.9mtpa. This phase includes major projects like Vijayanagar, BPSL and Dolvi.
- As of now, the 5mtpa JVML expansion has been completed, taking its total India capacity to 34mtpa. Further, a 7mtpa expansion is underway (2mtpa Vijayanagar + 5mtpa Dolvi) and is targeted to be commissioned by Sep'27. Several debottlenecking projects are also planned (BPSL 0.5mtpa + Salem 0.2mtpa), which will altogether increase the capacity to 42mtpa by Sep'27.
- Additionally, Phase-II expansion (awaiting board approval) could increase the company's total domestic capacity to 50mtpa by FY31.
- The ramp-up of newly added capacity will support ~10% volume CAGR over FY26-27E and will drive robust volume growth in the long run, with timely commissioning at steady intervals.

Cost leadership via resource optimization and raw material security

- JSTL focuses on reducing costs by enhancing raw material integration, logistics efficiency and higher renewable energy (RE) share.
- It currently meets ~37% of its iron ore needs via captive mines, which JSTL aims to increase to 50% by FY26 through expansions in Karnataka, Odisha, and Goa. On the coking coal front, JSW has secured domestic coal mines and overseas assets (like Illawarra and Mozambique) to reduce import dependency.
- Additionally, JSTL is building infrastructure like slurry pipelines, captive ports, and rail enhancements to cut freight costs.
- The company is also aggressively integrating RE, with 996 MW commissioned under Phase I and another 1,470 MW planned by FY27, to lower power costs and carbon footprint.

Premiumization through VASP portfolio enhancement

- To improve margins and diversify product portfolio, JSTL is expanding its high-margin value-added special product (VASP) segment, which comprised 62% of sales (excl. JVML) in FY25, with 100 new product grades introduced.
- The company is investing in new lines, including a 0.4mtpa automotive-grade CGL line at Vijayanagar and a CRGO JV with JFE.
- JSTL has downstream capacity of 13.5mtpa in India, supplying to auto, infra, and RE sectors. In the long run, JSTL aims to maintain over 50% share of VASP in its product mix, grow into new segments like defense and railways, and continue to strengthen its position in solar and wind applications.

Motilal Oswal research is available on www.motilaloswal.com/Institutional-Equities, Bloomberg, Thomson Reuters, Factset and S&P Capital.

Valuation and view

- JSTL's EBITDA moderated to INR8,659/t in FY25 (from INR11,395/t in FY24), primarily due to the weak NSR caused by higher cheap imports in India. However, the muted input cost (especially coking coal) partially offset the impact.
- Going forward, we estimate double-digit revenue growth in FY26/FY27, driven by the ramp-up of new capacity and price recovery. Further, as input costs are expected to remain soft, we believe EBITDA margin would rebound to 18-19% in FY26/FY27 (~INR12,000/t in FY26E and ~INR13,500/t in FY27E) on account of domestic steel price recovery led by safeguard duty.
- Strong margins will enable JSTL to generate CFO of INR620b, which can be utilized to fund the expansion plans of INR350b (INR150-200b each) over FY26-27E and any potential deleveraging efforts. JSTL's net debt-to-EBITDA ratio declined to 3.34x as of 4QFY25, which we expect to decline to 1.7x by FY27E, supported by robust operating profit.

At CMP, JSTL trades at 7.6x FY27E EV/EBITDA. We reiterate our BUY rating on the stock with a TP of INR1,180 (premised on 8.5x EV/EBITDA on FY27 estimate).

Leadership Takeaways from Annual Report

Mr. Sajjan Jindal

Chairman & Managing Director

- ✓ “India’s steel consumption grew 11.5% YoY to reach 152mt in FY25 and the GOI’s strong push for infra development will continue in FY26 with a planned outlay of INR11.2t. Further, the growth in manufacturing, defense, energy and real estate construction is expected to keep steel demand robust.”
- ✓ “JSW Steel has been steadily growing with India and is now the country’s largest steelmaker with domestic capacity of 34.2MTPA and are well-placed to pursue value-accretive growth with a domestic capacity target of 50MTPA by FY31.”
- ✓ “Amidst this strong steel demand growth in India but a fairly challenging global environment, Company have achieved highest ever production and sales volumes in FY25. Further, the recently commissioned 5MTPA capacity at JVML in Vijayanagar is ramping up well, along with the 1MTPA expansion at BPSL completed in FY25 will drive higher production and sales in FY26.”
- ✓ “JSW Steel today has a portfolio of 23 iron ore deposits with ~1.6bt of resources in India. Of the total, 12 are already operationalized and the rest are at various stages of development.”
- ✓ “At JSW Steel, company is focused on growing value-added and special products (VASP) portfolio, with wider and specialized applications across end-user industries. During FY25, ~62% of the sales volumes were in the form of VASP. Company have added alloy steel capacity at BPSL, a color-coated steel plant in Jammu & Kashmir, and augmented Anjar plate mill with a Mulpic cooling system to enhance product quality.”
- ✓ “JSTL have commissioned ~1GW of renewable energy (RE) capacity, along with an additional 1.5GW approved for development. RE has the twin benefit of decarbonizing steel production as well as reducing power costs.”
- ✓ “To diversify its global coking coal sourcing, company have acquired 20% effective stake in Illawarra high-grade coking coal mines in Australia. Also, announced the acquisition of Minas de Revuboe, which hosts a large untapped reserve of coking coal in Mozambique. These assets will significantly strengthen its long-term access to high-quality coking coal.”

Three key growth strategy

- ✓ Driving volume growth through strategic capacity expansion
- ✓ Cost leadership via resource optimization and improved raw material security
- ✓ Premiumization through value-added product portfolio enhancement

Driving volume growth through strategic capacity expansion

To ensure long-term growth, operational excellence and market leadership, JSTL is undertaking a capex plan of INR600b for the next three years. This capital allocation will focus on augmenting steelmaking/downstream capacities, efficiency projects, raw material security and de-carbonization initiatives. After the Phase-I expansion, JSTL's domestic steelmaking capacity will increase by 17% to 41.9mtpa by Sep'27, providing a significant production room for stable volume growth. Additionally, the ramp-up of recently commissioned capacities (5mtpa JVML and 1mtpa BPSL) will support 10% CAGR volume over FY26-27E. Further, the timely commissioning of expansion projects at regular intervals should continue to drive robust volume growth for JSTL in the long run.

Key project updates
Vijayanagar expansion:

- The 5MTPA integrated steelmaking project at JVML, Vijayanagar, is nearing completion. During FY25, JVML has successfully commissioned a 4.5mtpa BF, which is currently operating at +90% of capacity utilization. JVML has also commissioned a steel-melt shop (SMS) with a capacity of 3.3mtpa, with one converter and both casters fully operational. The second converter is expected to be commissioned in 2QFY26.
- The other allied facilities, such as like the raw material handling system (RHMS), sinter plant, lime calcination plant and the other material handling facilities, have been commissioned in 3QFY25.
- The Coke Oven project comprising 4 x 0.75mtpa batteries is advancing well – three batteries are commissioned and the last one is expected by FY26 end.
- The upgrade of BF-3 at Vijayanagar will increase its capacity to 4.5mtpa from the existing 3mtpa by 4QFY26.

Exhibit 12: ~96% of capex (FY26-28E) for India operations

Source: MOFSL, Company

Exhibit 13: JSTL annual capex guidance

Source: MOFSL, Company

Dolvi Phase-III expansion:

- The Dolvi Phase-III expansion will expand the capacity to 15mtpa from 10mtpa. It includes BF (4.8mtpa), SMS (5mtpa) and hybrid continuous strip mill to produce plates and coils.
- The project includes 250MW CPP, which will utilize the excess gas available from the BF, reducing the overall power cost of the Dolvi unit.
- Key long lead-time equipment and materials have been ordered, with the Letters of Credit firmly established to ensure seamless procurement and execution. The project is on track for completion by Sep'27.

Bhushan Power & Steel (BPSL) Phase-II:

- BPSL Phase-II expansion from 3.5mtpa to 4.5mtpa was completed in 2QFY25 and the balance 0.5mtpa is expected to be achieved via debottlenecking by FY27E.
- The project has ramped up well, with BPSL achieving crude steel production of ~1mt in 4QFY25.
- The commissioning of the wire rod mill-2 will enhance the product mix portfolio, enabling BPSL to manufacture alloy wire rods and VASP enhancing EBITDA margins.

Salem expansion:

- JSTL targets to commission a steel-melting capacity of 0.20mtpa by mid-FY27E. This expansion will take the capacity to 1.2mtpa.

JSTL plans another 8mtpa expansion in the next phase, which will increase its total domestic steel-melting capacity to 50mtpa, subject to board approval.

Cost leadership via resource optimization and improved raw material security

JSTL has implemented a comprehensive cost-reduction strategy to improve profitability and cost competitiveness. This strategy focuses on: a) optimizing raw material sourcing, b) enhancing logistics efficiency, c) integrating RE, and d) improving operational performance. While any immediate benefits from these cost-saving measures may be difficult to comprehend, in the long run it will position JSTL's India operations as a cost leader in the industry.

Exhibit 14: Cost break-up (%)

Source: MOFSL, Company

Optimizing raw material sourcing and security

Iron Ore:

- JSTL has secured ~23 iron ore mines, totaling ~1.62bt in reserves. Twelve mines (nine in Karnataka and three in Odisha) are currently operational, which help JSTL to meet 37% (in FY25) of iron ore consumption through captive mines. JSTL plans to ramp up its captive iron ore, which will reduce its dependency on external suppliers and mitigate price fluctuations. JSTL targets captive source to reach ~50%, offsetting the market price volatility.
- JSTL has nine existing mines in Karnataka with EC of ~7mt and is on track to add 4mt, taking the total capacity to 11mt. The company is also allotted three new mines with EC of ~4.5mt, expected to be operational by 1HFY26E.
- The mining operation at Cudnem is expected to start by 1QFY26E and Surla mines by 4QFY26E. The recently acquired Codli mine is projected to commence production by 4QFY27E. JSTL targets to operate three mines in Goa with cumulative production capacity of 3.5mt, which will support Dolvi operations.
- From Odisha mines, the company aims to increase the EC limit to ~30mt cumulatively (vs. 28mt currently). Additionally, BPSL is developing the Nethra Manda iron ore mine, which is expected to begin operations in early FY26E.

Exhibit 15: Current production capacity (EC Limit) stood at ~35mt (~28mt Odisha + ~7mtpa Karnataka) and target to increase it to ~41mt (~30mt Odisha + ~11mtpa Karnataka) by enhancing EC limit

Mines	Current Status	Timeline	Est. Capacity (MT)	Key Updates
Karnataka				
Existing 9 Mines	EC expansion planned	Operational	11MT (post-EC)	Increasing ECs to 11mt.
Vyasankere	Under commissioning	Q4 FY25	TBD	Will start by end of FY25.
Jaisinghpura South/North	Under commissioning	Q1 FY26	TBD	Expected to start in early FY26.
Goa				
Cudnem	Under commissioning	Q1 FY26	TBD	Operations to begin in 1QFY26.
Surla	Under commissioning	Q4 FY26	TBD	Expected to start by the 4QFY26.
Codli	Under development	Q4 FY27	TBD	Recently acquired will star later in FY27E.
Odisha				
Ganua	EC expansion planned	Operational	Up to 30MT (post-ECs)	High-quality reserves; EC under process
Nuagaon	EC expansion planned	Operational	Up to 30MT (post-ECs)	High-quality reserves; EC under process
Narayanposhi	EC expansion planned	Operational	Up to 30MT (post-ECs)	High-quality reserves; EC under process

Jajang	Closure plan submitted	Closed (Nov'24)	N/A	Operation closed - uneconomical resource.

Source: Company, MOFSL

Coking coal:

- JSTL's portfolio includes three coking coal mines in Jharkhand - Moitra Coal Block (1mtpa), Parbatpur Central Coal Mine (0.9mtpa) and Sitanala Coal Mine (0.3mtpa).
- In addition, JSTL has secured 2.06mtpa of non-regulated sector coking coal (purchased via long-term linkage) and a washery plant, Dugda Coal washery, which comes with a 2mtpa of fuel supply agreement linkage.
- JSTL's raw coal availability from these sources is 6.26mtpa (of which clean coal availability is 3.36mtpa) with an average yield of 54%.
- It has acquired a ~20% stake in Illawarra Coal Holdings Pty Ltd. The primary objective was to secure prime hard coking coal availability for the company. Illawarra Metallurgical Coal owns and operates two metallurgical coal mines in New South Wales, Australia – the Appin and Dendrobium mines are estimated to have an annual combined offtake capacity of ~1.2mtpa.
- On the Mozambique asset, JSTL is in discussions with the government related to the coking coal mine acquisition from MDR and is awaiting further clarity. This acquisition, if finalized, would further reduce JSTL's dependency on imported coking coal and strengthen its raw material security.

Exhibit 16: Coking coal assets - Strengthening JSTL's coking coal security

Mine/Asset	Location	Current Status	Timeline	Key Updates
Moitra Mine	India (Jharkhand)	Lease signed (Jan'25)	Q4 FY26	❖ Will enhance JSW's captive coking coal supply
Parbatpur Mine	India (Jharkhand)	Under development	Q4 FY26	❖ Expected to start production along with Moitra
Sitanala Coal Mine	India (Jharkhand)	Under development	FY27-28	❖ Not yet operational — in pre-production phase
Illawarra Mines	Australia	20% stake secured	Apr'25	❖ Offtake will commence, ensuring a stable coal supply
Mozambique Mine	Mozambique	Under negotiation	TBD	❖ Awaiting government approval; ongoing discussions

Source: Company, MOFSL

Enhancing logistics efficiency via slurry pipelines, port handling capacity and railway logistics

- The company is developing a slurry pipeline network for transporting iron ore from mines to upcoming pellet plants efficiently, reducing its dependency on rail and road transport.
- A 302km slurry pipeline (with 30mtpa capacity) is under construction from Nuagaon Mine to Jagatsinghpur, Odisha, which is being implemented by JSW Infrastructure.
- JSTL is constructing an 8mtpa pellet plant in Jagatsinghpur with proximity to Jatadhar Port, which will further optimize the supply chain. Management also proposed a 13.2mtpa integrated steel plant at Jagatsinghpur.
- The company already uses multiple ports for its operations and plans to increase handling capacity at ports via higher throughput capacity for iron ore, coking coal, and finished steel. Similarly, it plans to expand rail rake fleet by increasing dedicated rail rakes. It is also setting up dedicated railway sidings at plants to leverage DFC and operational/cost efficiency.

RE Integration to reduce carbon footprint and operational costs

- JSTL is actively integrating RE into its operations to reduce its carbon footprint and support its de-carbonization roadmap.
- As of FY25, the company has installed 782MW of RE capacity (includes 225 MW solar + 557 MW wind power). The company has also entered into a power purchase agreement with subsidiaries of JSW Energy to procure wind and solar power. This includes a mix of off-site wind and solar generation, primarily located in Karnataka, Maharashtra, and Tamil Nadu, supplying power to key operating sites such as Vijayanagar and Dolvi.
- The RE integration plan will be in a phased manner — targeting 996MW in Phase-I and additional 1,470MW in Phase-II.

Exhibit 17: RE Integration plan to reduce carbon footprint and operational cost

Phase	Location	Type	Capacity (MW)	Commissioning Status
Phase I	Vijayanagar	Solar	225	❖ 100% commissioned
	Vijayanagar	Wind	600	❖ 75% commissioned, balance by Q2 FY 2025–26
	Vijayanagar	Floating Solar	20	❖ To be commissioned by Q2 FY 2025–26
	Dolvi	Wind	96	❖ 70% commissioned, balance by Q2 FY 2025–26
	Salem	Wind	38	❖ 100% commissioned
	Anjar	Solar + Wind	17 (8+9)	❖ To be commissioned by Q3 FY 2025–26
Total Phase I		—	996	~80% commissioned
Phase II	Vijayanagar	Solar + Wind	600 (200+400)	❖ By December 2026
	Dolvi	Solar + Wind	600 (200+400)	❖ By July 2026
	Salem	Wind	60	❖ By November 2026
	Vasind/Tarapur/Kalmeshwar/Khopoli (Coated)	Solar + Wind	210 (55+155)	❖ By November 2026
Total Phase II		—	1,470	Under development

Source: Company, MOFSL

Premiumization through VASP enhancement

JSTL has strategically deepened its focus on product diversification and value-added steel offerings, aiming to capture premium segments across automotive, RE, infrastructure, and appliance sectors. JSTL has total downstream capacity of 13.5tmta in India, with a wide range of product offerings that cater to diversified end markets across geographies.

- In FY25, VASP accounted for 62% of total sales (excluding JVML volumes), with 5% YoY growth in VASP volumes. The company introduced 100 new product grades and secured multiple product approvals, further expanding its customized product portfolio. Its flat product category—including hot-rolled, cold-rolled, galvanized, and color-coated steel—contributed 74% of revenue, underscoring its relevance in industrial, engineering, and construction sectors.

Exhibit 18: VASP share of total sales stood at 60%

- The company also invested in downstream growth, commissioning a color-coated line of 0.12mta in Jammu & Kashmir in FY25. Low relaxation pre-stressed concrete (LRPC) facilities of 144ktpa were implemented in two phases of 72ktpa each during Dec'22 and Jun'24.
- JSTL's near-term plan is to set up 0.6mta of CR mill complex, pickling line, GI/GL line and zero spangle line in Khopoli, Maharashtra, and 0.4mta high-strength automotive grade CGL line in Vijayanagar, Karnataka. It aims to set up 100ktpa of cold rolled grain oriented (CRGO) facility in Vijayanagar through a joint venture with JFE.
- In the long run, JSTL targets to maintain VASP share at over 50% of the total product portfolio. It is also penetrating into new strategic markets, including defense and railways, while strengthening its presence in existing ones (especially solar and wind energy applications).
- With a steady rise in crude steel capacity, we believe the VASP share to decline in the near term. Management aims to maintain VASP at ~50%, and with the overall volume growing, NSR will lead to premiumization.

Favorable macros: Price recovery + muted cost = margin recovery

- JSTL's EBITDA moderated to INR8,659/t in FY25 (from INR11,395/t in FY24), primarily due to the weak NSR caused by higher cheap imports in India. However, the muted input cost (especially coking coal) partially offset the impact.
- Going forward, we estimate double-digit revenue growth in FY26/27E, driven by the ramp-up of new capacity and price recovery. Further, as input costs are expected to remain soft, we believe EBITDA margin will rebound to 18-19% in FY26/27E (~INR12,000/t in FY26E and ~INR13,500/t in FY27E) on account of domestic steel price recovery led by safeguard duty.
- Coking coal (premium HCC) prices continued to hover at USD190-200/t, with average prices remaining flat QoQ at USD200/t in 1QFY26.

Exhibit 22: Consol. EBITDA/t is expected to rebound to INR12,000-13,500/t in FY26/27E

Source: MOFSL, Company

Exhibit 23: Avg HCC prices remained flat QoQ at USD200/t

*Consolidated

Source: MOFSL, BigMint

Exhibit 24: Imported iron ore prices remained muted QoQ

Source: MOFSL, BigMint

- India became a net steel importer during FY25, as India's net import increased from 0.7mt in FY24 to 4.2mt in FY25. This increase in cheap imports kept domestic prices under pressure during FY25.
- To support domestic steel prices and curb cheap imports into India, DGTR had imposed 12% safeguard duty. As a result, India's imports fell by 50% YoY as of Jun'25; however, exports have also declined, primarily due to global supply tightness caused by tariffs/duties and oversupply by China.

- Global flat prices remained under pressure due to the oversupply from China (USD460/t as of Jun'25) because of weak consumption. While the US tariff tension has become a potential headwind for the industry, the safeguard duty in India is providing a critical support to domestic prices. Average flat prices rose to INR51,700/t in 1QFY26 from INR47,750/t in 3QFY25. Even rebar prices increased from INR51,200/t in 2QFY25 to INR55,350/t in 1QFY26. This price increase, along with muted cost, will boost EBITDA/t by INR1,500-2000/t during the quarter.

Exhibit 25: Domestic HRC prices rebound to INR52,000/t

Source: MOFSL, BigMint

Exhibit 26: Rebar prices corrected amid seasonal weakness

Source: MOFSL, BigMint

- JSTL's capacity expansion positions it well for long-term growth. With healthy volume growth, better realization and muted input costs, EBITDA will clock a ~36% CAGR over FY26-27E. This will help JSTL generate strong CFO of INR620b, which can be utilized to fund the expansion plans of INR150-200b each in FY26-27E and any deleveraging efforts.
- JSTL's net debt/EBITDA declined to 3.34x as of 4QFY25, which we expect to decline to 1.7x by FY27E, supported by robust operating profit.

Exhibit 27: ROE (%) and ROCE (%) set to improve in FY26/27E

Valuation

While near-term margins were affected by weak NSR, we estimate double-digit revenue growth in FY26E, driven by the ramp-up of new capacity and price recovery. Further, as input costs remain soft, we expect EBITDA to rebound to ~INR12,000/t in FY26E and ~INR13,500/t in FY27E.

Strong margins will enable JSTL to generate CFO of INR620b, which can be utilized to fund the expansion plans of INR350b (INR150-200b each) over FY26-27E and any potential deleveraging efforts.

At CMP, JSTL trades at 7.6x FY27E EV/EBITDA. We maintain our FY26/FY27 estimates and reiterate our BUY rating on the stock with a TP of INR1,180 (premised on 8.5x EV/EBITDA on FY27 estimate).

Exhibit 29: TP calculation

Y/E March	FY27E
Consolidated Volumes (mt)	31.7

Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at <https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx>

MOFSL, its associates, Research Analyst or their relatives may have any financial interest in the subject company. MOFSL and/or its associates and/or Research Analyst or their relatives may have actual beneficial ownership of 1% or more securities in the subject company at the end of the month immediately preceding the date of publication of the Research Report or date of the public appearance. MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may have any other potential conflict of interests at the time of publication of the research report or at the time of public appearance, however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

In the past 12 months, MOFSL or any of its associates may have:

- received any compensation/other benefits from the subject company of this report
- managed or co-managed public offering of securities from subject company of this research report,
- received compensation for investment banking or merchant banking or brokerage services from subject company of this research report,
- received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report.

- MOFSL and its associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.
- Subject Company may have been a client of MOFSL or its associates during twelve months preceding the date of distribution of the research report.
- Research Analyst may have served as director/officer/employee in the subject company.
- MOFSL and research analyst may engage in market making activity for the subject company.

MOFSL and its associate company(ies), and Research Analyst and their relatives from time to time may have:

- a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein.
- be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

Above disclosures include beneficial holdings lying in demat account of MOFSL which are opened for proprietary investments only. While calculating beneficial holdings, It does not consider demat accounts which are opened in name of MOFSL for other purposes (i.e holding client securities, collaterals, error trades etc.). MOFSL also earns DP income from clients which are not considered in above disclosures. To enhance transparency, MOFSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report.

Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

Disclosure of Interest Statement	HCL Technologies
Analyst ownership of the stock	No

A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com. Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Financial Services Limited (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.

MOTILAL Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts"), and under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and

interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets Singapore Pte Ltd ("MOCMSPL") (Co. Reg. NO. 201129401Z) which is a holder of a capital markets services license and an exempt financial adviser in Singapore. Persons in Singapore should contact MOCMSPL in respect of any matter arising from, or in connection with this report/publication/communication. This report is distributed solely to persons who qualify as "Institutional Investors", of which some of whom may consist of "accredited" institutional investors as defined in section 4A(1) of the Securities and Futures Act of Singapore. Accordingly, if a Singapore person is not, or ceases to be, such an investor, they must immediately discontinue any use of this Report and inform MOCMSPL.

Disclaimer:

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
