STUDIO

Leo9 is a studio that specialises in social media integration, digital media marketing, creating corporate identity & brand positioning, website development etc.

SERVICE AT YOUR FINGER TIPS

Objective.

The existing app (for both mobile and web) was boring and tedious, the goal was to simplify the process right from selecting the services to booking and payments.

Application.

The app has made life simpler for those seeking help for daily chores and repairs. Functionality combines with a spunky design that attracts customers. A few steps for new customers and even fewer for returning ones is the USP of the new and improved Timesaverz app.

Result.

Understanding the needs and linking them to the right man for the job in 3-5 simple steps while establishing brand identity and a favourable interface fetched upto 20% more sale in the first few month ←
