**Patterns are addictive.**  
The overall visual arrangement created by patterns is amusing. There is so much to look for in them. The harmonious repetition, the symmetry or utter chaos and how it all comes beautifully together is exciting. Projecting this movement through your visuals can be very satisfying.

**You are your own inspiration.**  
For an artist, nothing can be more inspiring than one's own dreams and thoughts. Dig into your own psyche and cull out ideas that are extremely personal and symbolic. There lies your first step to a great creation. At times, you may take help of influences like music but it's your own mind that you need to cultivate.

**There should be a bit of you in every work.**  
Whatever you do, whether they follow the same style or medium, there should always be a hint of your distinctive touch in them. The presence of your expression or ideas is what going to make your work long lasting and worthwhile ←
