# ORBITAVANYA TECH LLP

BUILDING INTELLIGENT  
DIGITAL ECOSYSTEMS FOR A  
CONNECTED FUTURE

Anjali Sharma | The CEO Magazine

**RANJEET KUMAR**  
CEO & FOUNDER  
ORBITAVANYA TECH LLP

As institutions struggle with fragmented workflows, siloed data, and mounting pressure to modernise, the need for truly integrated digital ecosystems has never been more urgent. OrbitAvanya Tech LLP operates within this evolving space, bringing together technology, scalability, and execution to enable institutions to function more efficiently in a connected digital environment.

As an ISO-certified, CMMI Level 3, GDPR, and SOC 2 compliant IT and manpower solutions company, OrbitAvanya Tech LLP focuses on building robust digital infrastructures tailored to the needs of government bodies, public-sector undertakings, and private enterprises. Its portfolio spans ERP systems, Learning Management Systems (LMS), e-Office automation, cloud solutions, and large-scale document digitisation, each designed to streamline operations and enhance productivity while ensuring long-term scalability.

What differentiates the company is its emphasis on combining technical capability with practical implementation. Rather than offering standalone tools, OrbitAvanya Tech LLP builds cohesive digital ecosystems that address real operational challenges – having supported government bodies and public sector undertakings in transitioning from fragmented processes to integrated, data-driven systems.

## DRIVING VISION THROUGH LEADERSHIP

Driving this approach is **Ranjeet Kumar, CEO & Founder, a Microsoft Certified AI Professional** with over 18 years of rich experience in government and public-sector domains, whose vision continues to shape the organisation's direction. Having built the company from the ground up, he has grounded its growth in an unwavering commitment to innovation, quality, and client-centric execution.

His perspective on technology is rooted in its real-world application, where systems are not just designed for efficiency but for impact. Under his leadership, **OrbitAvanya Tech LLP** has developed solutions that support institutions in modernising workflows, improving accessibility, and strengthening decision-making capabilities.

This focus on AI-driven innovation positions the company as a forward-looking partner for organisations navigating increasing complexity in their digital journeys.

## A PHILOSOPHY OF PRACTICAL INNOVATION

*"Most organisations automate tasks – we build systems that think. At OrbitAvanya Tech LLP, our mission is to create intelligent digital ecosystems that don't just streamline processes but transform how institutions make decisions and deliver impact," says Ranjeet Kumar.*

This philosophy reflects the company's broader vision to move beyond conventional IT services and play a role in shaping how organisations evolve in a technology-driven environment.

## LOOKING AHEAD

With recognised industry credentials, including **Start-up India, MSME**, and registrations across the portal (**Gem Seller ID: MZKP250012996659, SAM.gov USA and D-U-N-S: 772678096**), UK, and UAE markets, and a **Great Place To Work** certification reflecting its commitment to a people-first culture, OrbitAvanya Tech LLP continues to strengthen its foundation while expanding its capabilities. Its focus remains on integrating AI, automation, and innovation to build systems that are not only efficient but also future-ready.

Guided by its vision to become a leading provider of intelligent digital solutions, the company is positioning itself at the forefront of digital transformation, enabling institutions to operate smarter, faster, and with greater clarity in an increasingly complex world.
